

Learning about \$MONEY\$

Burke & Herbert Bank's Financial Literacy Program

Burke & Herbert Bank is committed to increasing financial literacy among our youth. As the area's longest serving bank, we feel a responsibility to support parents and teachers with the important goal of educating children about money, understanding how banks and financial institutions operate, and helping them to make smart choices in their future when it comes to credit.

With these goals in mind, we are proud to offer our **"Learning About Money"** program through which members of the Burke & Herbert Bank team visit schools to help increase understanding about financial matters with lessons tailored for students K-12. We believe through these efforts that together, teachers, parents/guardians and Burke & Herbert Bank can make a difference in the financial future of our children.

If your school or youth organization is interested in having us assist you with a lesson or lessons for students on financial literacy please **click here**. With this easy information form, we will match your goals and needs with the right lesson and Burke & Herbert Bank team member to visit your students.
